## NOTICE OF PROPOSED ACTION

January 23, 2008

The Nevada Division of Environmental Protection is issuing this Notice of Proposed Action under the Nevada Revised Statutes and the U.S. Clean Water Act. The Division has received a complete application to renew National Pollutant Discharge Elimination System (NPDES) permit NV0023230 from:

Kinder Morgan Energy Partners LP  
370 Van Gordon St  
Lakewood CO 80228-8304

The permit is for the discharge from a groundwater treatment system at the Kinder Morgan fuel storage site at 5049 N Sloan Lane, Clark County. The principal contaminants are MTBE, toluene, benzene, ethyl benzene, and xylenes. The cleanup is being conducted pursuant to the requirements of the Division's Bureau of Corrective Actions, and soil vapor extraction, groundwater treatment, and reinjection processes are in place. Groundwater treatment consists oil water separation, carbon adsorption, manganese precipitation, and arsenic adsorption. Discharge is to a box culvert on Sloan Channel, which is earthen along this reach. The Division has made the tentative determination to renew NPDES permit NV0023230 for a five year term. Comments, objections, or public hearing requests on this matter must be submitted in writing to:

Bureau of Water Pollution Control  
Nevada Division of Environmental Protection  
901 S Stewart St Ste 4001  
Carson City, Nevada 89701-5249

by 5:00 pm Tuesday March 4, 2008. Mail postmarked on that date will also be accepted. Hearing requests must indicate the interest of the person filing the request and the reasons why a hearing is warranted. Any public hearing would be preceded by a thirty day public notice period. If no hearing is held, and substantial changes are proposed in response to the comments received, a new public notice period would be conducted for the revised permit.
